Amendments to Claims

1. (Currently Amended) A polymeric composition comprising:  
a first plurality of first monomeric units comprising an aromatic group with at least one substituent selected from alkyl, heteroalkyl, alkenyl, heteroalkenyl, alkynyl, heteroalkynyl, aryl, arylalkyl, heteroaryl, heteroarylalkyl, and amino, and  
a second plurality of second multi-functional monomeric units, wherein each multi-functional monomeric unit is capable of forming a branching point in the polymeric composition, wherein the second monomeric unit is selected from triaryl amines.
2. (Original) The polymeric composition of Claim 1, wherein the aromatic group is selected from fluorene, spirofluorene, phenyl, biphenyl, bridged biphenyl, naphthalene, and anthracene.
3. (Original) The polymeric composition of Claim 2, wherein the aromatic group is a dialkylfluorene.
4. (Canceled)
5. (Canceled)
6. (Currently Amended) ~~The polymeric composition of Claim 5~~ A polymeric composition comprising:  
a first plurality of first monomeric units comprising an aromatic group with at least one substituent selected from alkyl, heteroalkyl, alkenyl, heteroalkenyl, alkynyl, heteroalkynyl, aryl, arylalkyl, heteroaryl, heteroarylalkyl, and amino, and  
a second plurality of second multi-functional monomeric units, wherein each multi-functional monomeric unit is capable of forming a branching point in the polymeric composition, wherein the second monomeric unit is selected from:

7. (Original) The polymeric composition of Claim 1, wherein said multi-functional monomeric unit comprises from 0.1 mol% to about 5 mol% of the total polymeric composition.
8. (Original) An organic light emitting diode (OLED) comprising an active layer comprising the polymeric composition of Claim 1.
9. (Original) An electroluminescent device comprising an active layer comprising the polymeric composition of Claim 1.
10. (Canceled.)
11. (Canceled.)
12. (Canceled.)
13. (New) The polymeric composition of Claim 6, wherein the aromatic group is selected from fluorene, spirofluorene, phenyl, biphenyl, bridged biphenyl, naphthalene, and anthracene.
14. (New) The polymeric composition of Claim 13, wherein the aromatic group is a dialkylfluorene.
15. (New) The polymeric composition of Claim 6, wherein said multi-functional monomeric unit comprises from 0.1 mol% to about 5 mol% of the total polymeric composition.
16. (New) An organic light emitting diode (OLED) comprising an active layer comprising the polymeric composition of Claim 6.
17. (New) An electroluminescent device comprising an active layer comprising the polymeric composition of Claim 6.
